Research & Development Cell (R&D)

The Research & Development Cell (R&D) of PYDAH College of Pharmacy intent is to nurture research activities in the institute by promoting research in new emerging areas in pharmacy. It encourages research culture among the faculty and students. We also follow ethics in research and we encourage the students to be creative & innovating. The major role is stimulating contacts with the real world and promotes research in young minds by way of participating in project competitions, seminars, workshops and conferences.

Objectives:

- To create enthusiasm amongst students and faculty members towards research and innovation.
- To work closely with the industrial needs that eventually will result in new or improved drug development, processes of different formulations or services that can increase the company's productivity.
- To foster collaborations for mutual benefits and to maximize industrial connectivity.
- To establish collaboration with other universities, public and private sectors and identify R&D projects including consultancy services which could be undertaken at the institution.

The following members are constituted as the Research and Development Cell
